Rood & Riddle Equine Hospital

Jamie Kaczor, DVM
Rood & Riddle Equine Hospital

Erin Lohbeck, DVM
Rood & Riddle Equine Hospital

Nate Newton, DVM
Rood & Riddle Equine Hospital

Intent of Symposium

The Equine Theriogenology Wet Lab aims to bring together experienced equine theriogenologists and trainees for skill development and discussion. The ability to meet and discuss techniques and perspectives in a hands-on environment will hopefully advance the skill set of all attending as well as raise new questions, formulate new areas of research and facilitate contacts between practitioners.

Continuing Education

This course has been submitted for continuing education credit for veterinarians in jurisdictions which recognize AAVSB RACE approval; however, participants should be aware that some boards have limitations on the number of hours accepted in certain categories and/or restrictions on certain methods of delivery of continuing education.

**ROOD & RIDDLE
FOUNDATION, INC.**

The Rood & Riddle Foundation is a 501 (c) 3 non-profit organization and an approved RACE (Registry of Approved Continuing Education) provider. The mission of the Rood & Riddle Foundation is to provide charitable support for our community, and to sponsor and promote education in the veterinary profession.

The Society for Theriogenology conducts an annual convention every summer. Due to challenges with the time of year and venue, it is often difficult to coordinate wet labs as part of this annual convention. This year Rood & Riddle In Lexington offered to do an Equine Wet Lab whereby a portion of the registration proceeds will support the mission of the Society. In future years it is hoped that practices/facilities will volunteer to host wet labs in Bovine, Small Animal, and Exotics.

Please contact Tara Beasley at tara@franzmgt.com for more information on these future opportunities.
